1 - The Cards

Each card has:

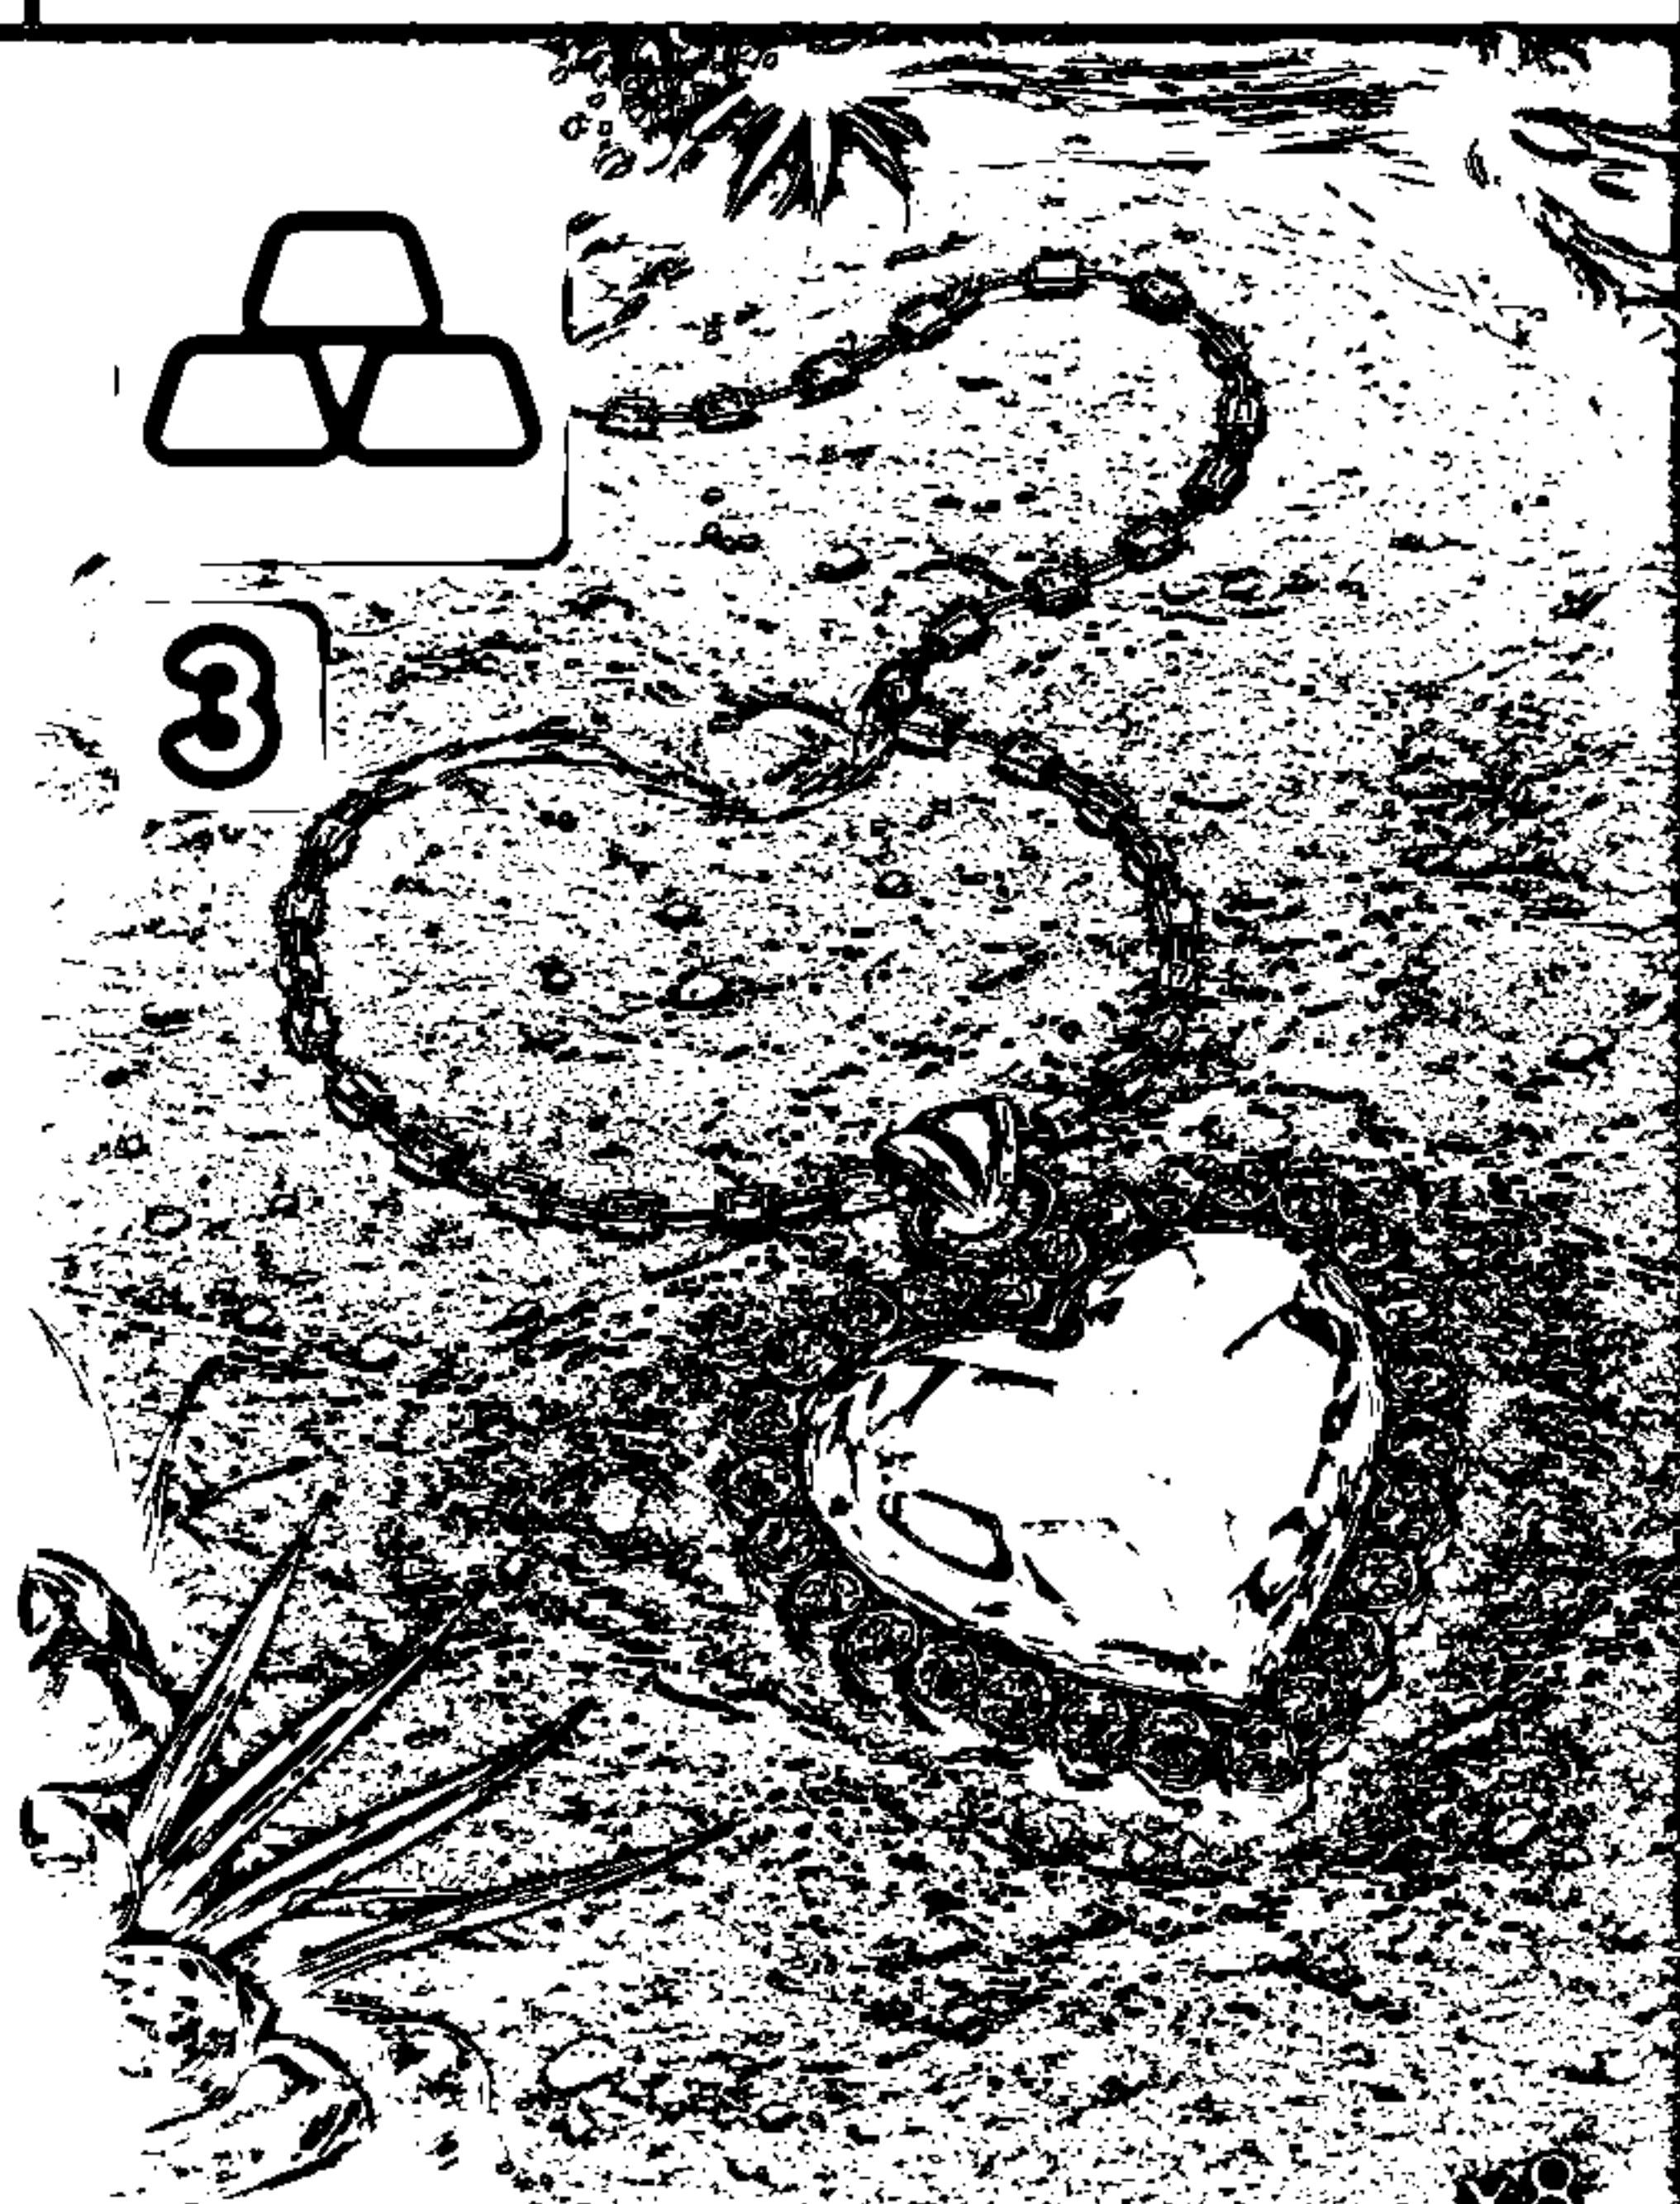

- A class icon (Sword, Foot, etc.) that determines the card effect
- A numeric point value that determines your final score at end of the round
- For combo cards, an effect icon
- The number of copies at the bottom (Ex: = 3 copies per deck)

Special cards:

- Point-only  with no ability, just points, kept in your hand till the round ends.
- Panic  placed face-up when drawn, never enter your hand.

2 - The Combos

Play 2 cards of the same class during your turn. Both cards are placed face-up in front of you (not in your hand).

Look at the top 4 cards of the deck. Put them all back on top or on the bottom, in the same order.

Force a player or yourself to draw from the top deck: (draw 2, discard 1)

Steal 1 random card from a chosen opponent, OR give them one of your Pante cards

3 - The Basics

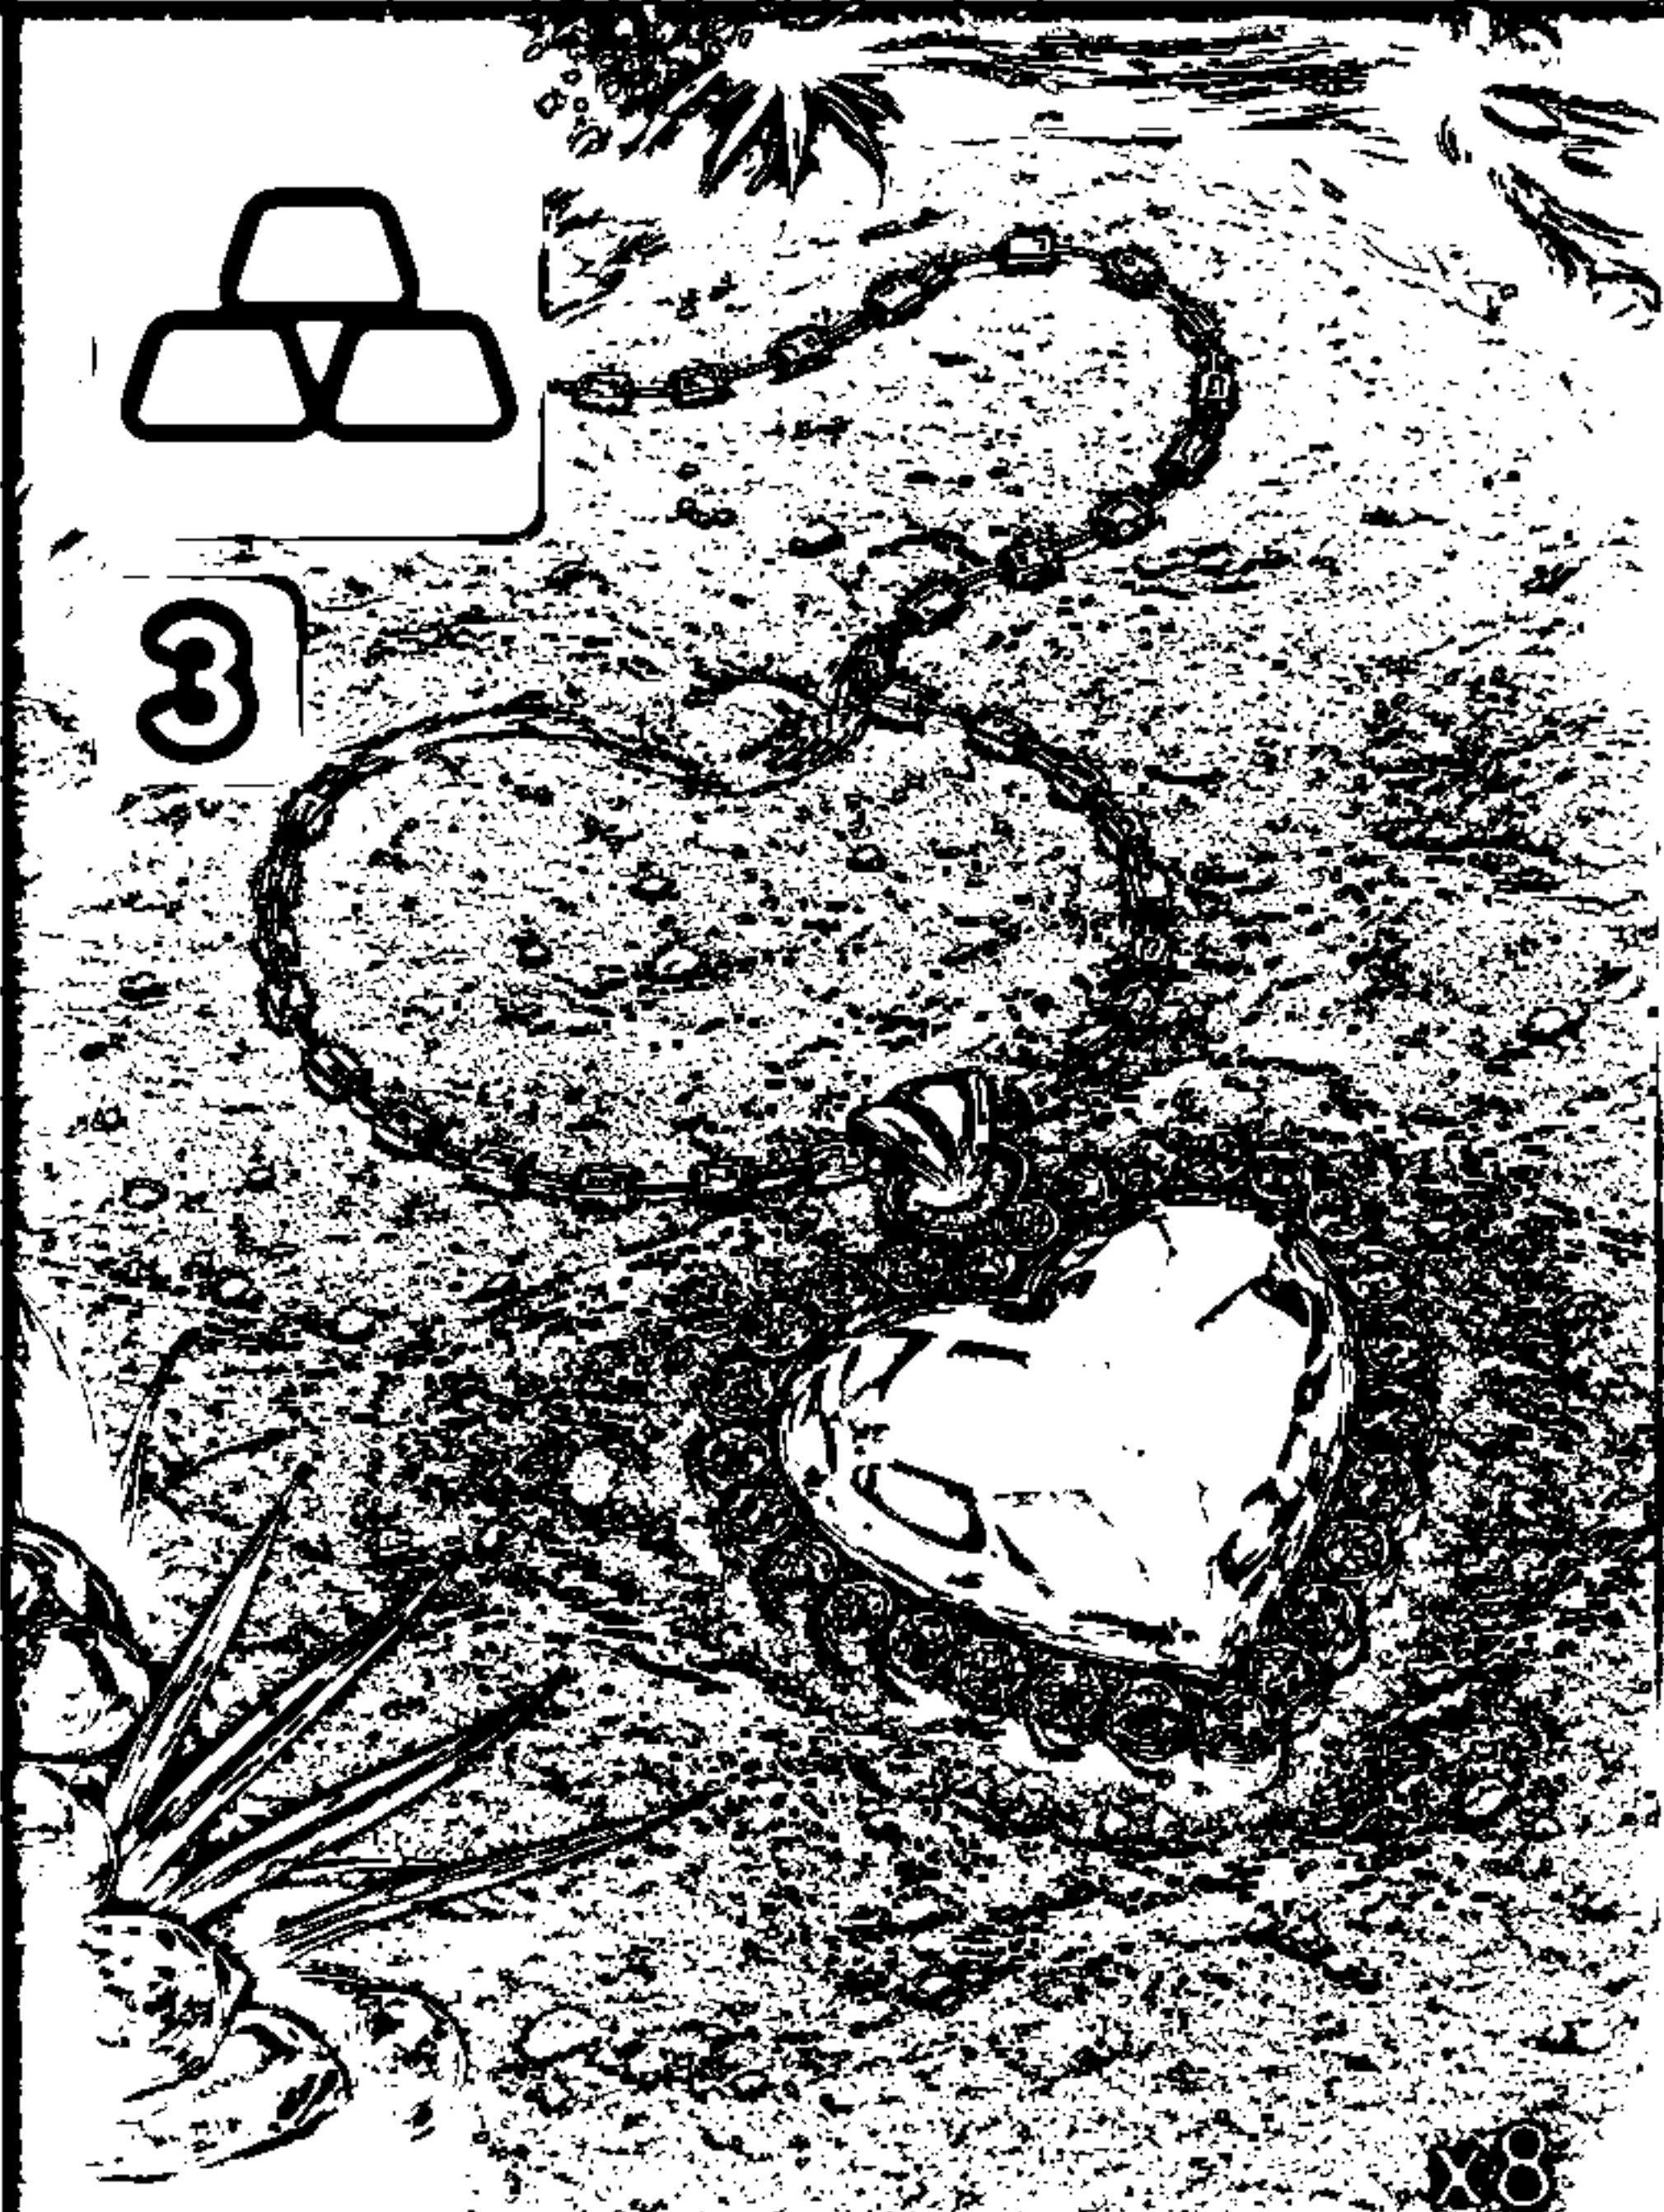

Goal is scoring the most points.
Only cards in hand score. Cards played
in front of you lose their point value.
If you have 25+ points in hand, you can
call STOP and end the round.

DRAWING (start of every turn, pick
one):

- Take the top card from the discard
pile, OR
- Draw 2 from the deck, keep 1,
discard 1. If one is a Panic card, it is
placed face-up in front of you and
the other must be discarded. If two
Panic cards are drawn, both must
be played and no card is discarded.

4 - Game Setup

Starting the round:

1. Shuffle the deck. Deal 5 cards each.
(Panic in opening hand must be placed face-up immediately)
2. Flip the top deck card to form the discard pile. If Panic, shuffle it back and repeat.

Playing:

Draw -- (optional) play any number of combos -- (opt) STOP -- end the turn.

The round ends when:

- A player declares Stop
- The deck is empty
- Only 1 player remains

5 - Panic Cards

Panic cards never enter your hand. When drawn, place them face-up in front of you immediately. Panic cards cannot be discarded.

A player hitting the 3rd Panic card is instantly eliminated from the round (score 0).

You can get rid of Panic cards by:

- Playing a sword combo to gift one to an opponent
- Discarding cards with value equal or greater than 15 points ~ destroy 1 of your face-up Panic cards.

The
Abyss

The
Abyss

The
Abyss

6 - Edge Cases

You cannot steal from yourself. You can play a Flock combo against yourself.

Multiple Pante drawn at once will resolve one at a time. You may pay the 15 points cost before the next one triggers.

Gifting a 3rd Pante via Sword triggers elimination check. Immediately, the opponent must discard 15 or more points or is eliminated from the round.

Combos can only be played during your turn and only after drawing.
